

COAL GEOLOGISTS URGENTLY REQUIRED IN AUSTRALIA. FULL RELOCATION PACKAGE PROVIDED

Our client, a lead provider of integrated services to major mining houses and exploration companies in Australia, is seeking 6 dedicated Coal Exploration Geologists to join their team. The roles are located in Central Queensland and the Hunter Valley, NSW. A generous salary and full relocation package is on offer to the successful applicants!!

Major duties include:

- Drill rig supervision, core & chip logging, geophysical interpretation
- Geotechnical logging and coal quality sampling of drill core
- Seam gas data acquisition, coal seam gas desorption and gas sampling
- Data acquisition, manipulation and management
- Ensuring the quality of data collected
- Supervising and training Junior Geologists and other contractors

A tertiary qualification in geology, team management skills and computer literacy are required, in particular familiarity with Minex, Minescap or Vulcan. Enthusiasm, a pro-active attitude and previous experience of 2-5 years in a similar role will be well regarded.

If you would like to build your career on a global scale, please send your CV to jobs@goglobalpartners.com or phone Dan Glass on +44 (0)7918 606 117.
