

Ormonde Mining PLC

Job Description

Ormonde Mining Plc (AIM & ESM) is focused upon mineral exploration and the development of sustainable mining projects in Spain.

The Company's key activities are:

- The Barruecopardo Tungsten Project where the company aims to develop a long life, low cost operation to initially produce ~8% of non-Chinese global mine production
- The La Zarza Copper-Gold Project where the company is exploring in Joint Venture with Antofagasta Minerals to further enlarge the known "massive sulphide" deposit containing significant copper, gold and zinc resources
- Gold exploration in several highly prospective areas of western Spain.
