

Junior Geologist – Perth-based, FIFO. Attractive salary package.

Min 1 year geology work experience

Our client is an emerging iron ore producer based in Western Australia's world-class Pilbara region.

We seek a well-qualified, motivated Junior Geologist to work in the mine geology area/grade control program.

Reporting to the Geology Superintendent you will be expected to assist with all geological functions, including logging and drill program design, grade control development and resource modelling as well as effective ore production, scheduling, reporting and documentation. Some geological mapping and sampling will also be required. Additionally, you will be expected to get involved with developing additional resources in conjunction with the resource development team.

Key responsibilities of this role include:

- Meet all safety requirements of the role.
- Coordinate and plan activities of the daily grade control processes
- Manage day to day pit geology functions in conjunction with production and planning
- Develop and maintain industry best practices in grade control processes
- Undertake geology project work as required to improve geological services and information to the mine
- In pit mapping and ore waste delineation
- Near mine exploration and resource definition drill supervision
- Section interpretation and geological modeling
- ROM and stockpile management
- Assist in monitoring reconciliations of grade control data with crusher throughput
- Liaising with site engineers for short and long term production planning
- Assist in reconciling grade control data with model predictions
- Reporting as required

The successful candidate will have the following:

- Recognised tertiary qualification in Geology or related discipline
- 1-3 years of professional experience within the mining industry in a similar role
- Demonstrated effective written and verbal communication skills
- Current driver's license with 4WD experience
- Legal entitlement to work in Australia on a permanent basis
- Computer literacy with Microsoft Office Suite

- Familiar with geological software packages Minesight, Surpac, or Vulcan
- Familiar with MapInfo, ArcGIS or other GIS packages
- Current Senior First Aid certificate.
