

FIELD GEOLOGISTS: OPPORTUNITIES AT CASP

If you love fieldwork and the great outdoors, are looking for a friendly and flexible working environment and relish stimulating academic discussions and challenges, this may be the opportunity for you.

CASP is a geological research organisation that is affiliated to the Department of Earth Sciences at the University of Cambridge. Funded almost entirely by the international petroleum industry, CASP is widely valued by its sponsors for combining original field-based research in remote areas with innovative regional synthesis.

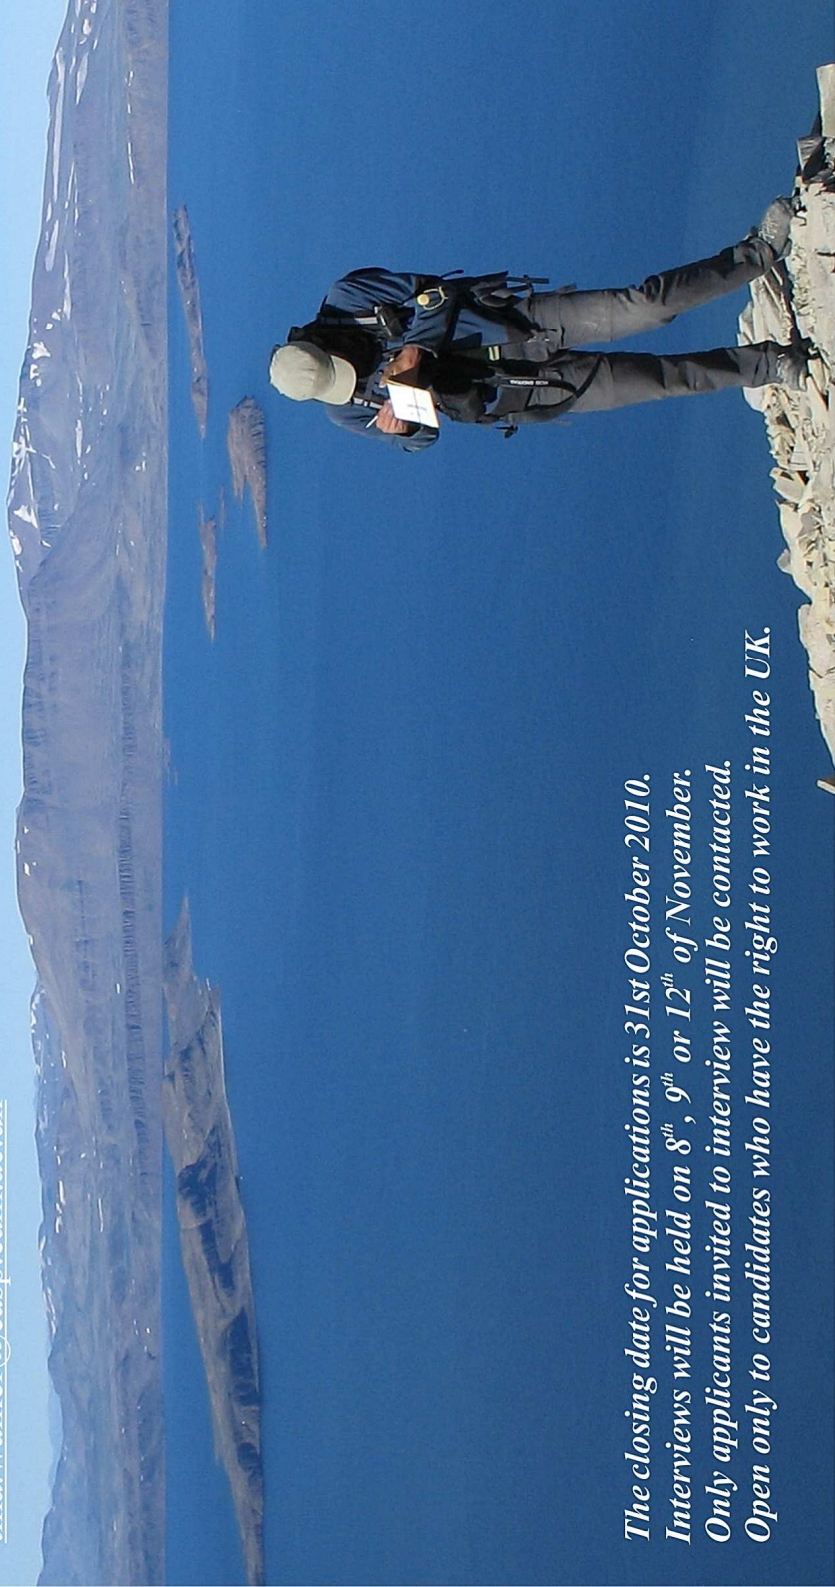

We are seeking to strengthen our team of geoscientists and are looking for **motivated field geologists** with a broad background and practical skills in structural geology and/or sedimentology.

Candidates will have completed a PhD and preferably a period of post-doctoral research. Skills in basin analysis, seismic interpretation and/or GIS would also be advantageous. Applicants should be enthusiastic field geologists ready to carry out fieldwork in areas as diverse as the Arctic, Russia, North Africa or the Middle East.

These permanent positions require the ability to work in a team, to interact with academic and industry contacts, and to take responsibility for project and research development. As well as writing reports for company sponsors, all CASP geologists are required to present their results at workshops and conferences and are strongly encouraged to publish their research and develop/maintain an academic profile.

Salaries are broadly in line with University of Cambridge scales (Grades 7-8) and include additional benefits. For further details about CASP, please visit: www.casp.cam.ac.uk

Please send a CV (naming 2 referees) and a covering letter explaining your motivation to tina.walker@casp.cam.ac.uk

*The closing date for applications is 31st October 2010.
Interviews will be held on 8th, 9th or 12th of November.
Only applicants invited to interview will be contacted.
Open only to candidates who have the right to work in the UK.*
