

Senior Mine Geologist Open Pit Mining

Xstrata Zinc - Mt Isa (Ref No. DS1383)

An opportunity exists for a suitably qualified Senior Geologist within our Open Pit Operations at Xstrata Zinc. This position is fully residential in Mount Isa, Queensland.

Reporting to the Geology Superintendent, you will be responsible for ensuring all geological work is completed safely and in compliance with the appropriate procedures and provide geological input so as to maximise production grade and minimise dilution. You will also ensure geological information used in developing and planning is prepared and presented in accordance with Company and professional standards and timeframes.

Ideally, you will possess a minimum of 5 years mine geology experience along with working knowledge of MineSight or similar mine planning software systems. Base metals experience would be highly regarded, as will a track record of Mineral Resource estimation involvement. You must also possess good teamwork and communication skills, have the ability to work unsupervised and be able to initiate, plan and deliver on a variety of operational tasks.

Interested? Please apply online at our website
