

Project Geologist – George Fisher Mine

A vacancy currently exists at George Fisher Mine for an underground Project Geologist, reporting directly to the Senior Mine Geologist. This is a residential role, which offers the successful candidate the opportunity to work as part of a large geological team in a multi-disciplinary, highly inter-active production environment.

The ore bodies at George Fisher Mine are part of a large, structurally complex, strigiform lead, zinc and silver deposit. Operation and production capabilities are currently in an expansionary phase and excellent opportunities for career development exist for a suitably qualified and experienced geologist. George Fisher has an underground Resource in excess of 180Mt and a mine life of more than 18 years at current rates.

Key responsibilities will include:

Assisting the Geology Superintendent and Senior Mine Geologist in:

- Ensuring that geological information used in developing, planning and operating the business is captured, interpreted and presented in accordance with Company and professional standards, and within timeframes such that shareholder value is maximised,
- Designing and managing drilling programmes to sustain the conversion of resources to reserves,
- Annual updating of resource models within timeframes such that shareholder value is maximised,
- Co-ordination of a team of geological staff to ensure that work is done safely, productively and professionally.

The successful applicant will ideally have:

- 4-5 years experience, of which at least 3 years were spent in underground mine geology,
- Base metals experience, while not essential, would be highly advantageous,
- A proficient working knowledge of MineSight or similar mine planning software system is essential,
- At least some experience in Mineral Resource estimation,
- Good interpersonal and communication skills,
- The ability to work in a team as well as individually and unsupervised,
- Ability to initiate, plan and deliver in an accurate and timely manner on a variety of operational tasks and projects.
