

JS Group are actively recruiting for a graduate level Geo-Environmental/Remediation Engineer.

JS Group, is one of the leading drilling and remediation contractors in Ireland. Due to the continued success and growth of our team, we are looking for an enthusiastic Geo-Environmental Engineer.

The Role

The role would suit an individual with a degree/masters within the disciplines of geoenvironmental science/engineering/geology/hydrogeology.

We are looking a motivated and organised individual with a practical attitude to site works and comfortable to deal with clients. In return, we would like to offer a permanent position (after a suitable probationary period) and are happy to invest in the right person's ongoing professional training.

The Person

The successful candidate will be enthusiastic, confident, self-motivated and willing to work on their own initiative, with excellent verbal and written communication skills. The candidate must show a willingness to learn and to work to the company's current QA, health and safety and environmental systems. The successful candidates will be able to demonstrate good experience and working knowledge of the following areas of work:

- An understanding/experience of the management and supervising Phase 1 and Phase 2 Geo-environmental investigations in accordance with standards BS5930:2015, BS 10175:2011+A1:2013 and the Model Procedures for the Management of Land Contamination, CLR 11;
- Experience of writing phase 1 desk studies and phase 2 factual or interpretative geoenvironmental reports would be advantages;
- Experience/understanding of the best practice for groundwater and soil sampling recovery would be advantageous;
- Experience in or/understanding of remedial options appraisal, as well as on the onsite implementation of remediation works;
- Experience of in-situ and ex-situ physical, chemical and biological remediation technologies an advantage;
- Excellent verbal, written and communication skills with the ability to factually check technical reports.
- Good organisational, record keeping and project management skills, ability to work to current QA system;
- Experience and or proficiency in using GIS, AutoCAD and HoleBASE packages would be advantageous.
- Experience and willingness to take on the responsibility for all aspects of H&S reporting and management in relation to onsite works.
- Ability to deliver projects on time and within budget with a strong focus on client care in project management and delivery.
- Willingness to travel and a full clean driving license are prerequisites of the role.

Graduate salary range is 25 to 30k based on experience. Please forward your CV to jim@jsremediation.ie/j.mchugh@jsgroup.ie – Closing date Friday 1st December 5pm
