

# PROJECT CONSULTANT (WATER)

## DUBLIN

Due to a steadily increasing workload we currently have an opportunity within our Dublin office for an enthusiastic and motivated Project-level Consultant to join our established Water team, specialising in environmental hydrogeology and hydrology. On the job training will be provided as required, and undertaking site work outside normal working hours and working away from home for short periods will be required. Due to SLR's diverse nature, the successful candidate will be given the opportunity to work across multiple disciplines.

SLR is uniquely placed as one of a very small number of independent, global Environmental and Advisory consultancies. Its unique "one team" culture as a single cost center means it is free from the inter office rivalry and charging which often hampers larger consultancies; and it has a flat management structure which facilitates progression based on performance allowing for excellent progression. Along with a competitive salary, all of our staff enjoy a benefits package which includes VHI membership, pension, business class travel insurance, death in service life cover and much more.

### Main Duties and Responsibilities

Duties and responsibilities include:

- Contributing to the production of hydrogeological and hydrological assessment reports;
- Drilling supervision, water quality sampling and hydro walkover surveys / monitoring;
- Production of Environmental Impact Assessment Report chapters including graphs and figures;
- Assisting in the writing and preparation of various technical reports, and;
- Assisting with other environmental services related work.

### Personal Specification

- BSc Geology or equivalent;
- Relevant MSc/MEng in hydrogeology, hydrology or related area is desirable;
- Demonstrable experience post-graduation in a similar consultancy/commercial environment, with any site investigation and environmental monitoring experience beneficial;
- Good computer skills (Microsoft Word/Excel/PowerPoint) and ideally experience of using GIS software (ArcGIS, MapInfo, AutoCAD);
- Strong communication and report writing skills and a good level of numeracy;
- Full Driving Licence;
- Progressing towards professional accreditation;
- Additional languages beneficial.
