

GROUP ELEVEN
RESOURCES LTD.

Senior Project Geologist

Group Eleven Resources is seeking a Senior Project Geologist to work on their advanced zinc exploration projects in Ireland. Candidates should be enthusiastic, self motivated and willing to travel extensively in Ireland. The candidate will have a third-level geoscience qualification and at least 5-10 years' experience in the exploration/mining industry, particularly in carbonate hosted Zn-Pb deposits. The job will be based at our offices in Mullingar, Co. Westmeath, reporting to the Project Manager. Experience of running drilling and field programmes is a necessity, along with excellent interpersonal, communication and report writing skills. Knowledge of specialist geological software packages will be an advantage, in particular MapInfo/Discover/Discover 3d.

Tasks will include the development and implementation of exploration projects with the project team including analysis of historical data, mineral potential evaluation, fieldwork / mapping / core-logging, supervision of soil sampling and geophysical programs, definition of drilling targets and supervision of drilling and report preparation.

Please respond by Friday 15th June 2018 including a detailed CV and cover letter to:

David Furlong
Chief Operating Officer
