

**Senior**

**Hydrogeologist**

**Location: Dublin or Remote**

**Job  
Opportunities**

**SLR is growing throughout Europe!**

We are looking for an enthusiastic Senior Consultant to join our Dublin office or work remotely. This position presents an outstanding opportunity to join a large team of hydrogeologists and hydrologists and be part of SLR's Water Environment group which also comprises flood risk specialists and geochemists.

#### **Person Spec Summary:**

- A relevant degree level qualification incorporating hydrogeology and/or environmental geoscience.
- Hydrogeological / Environmental Geoscience experience gained in a consultancy or similar commercial environment post-graduation including project management and delivery.
- Demonstrable experience in the development of hydrogeological conceptual site models, site work including drilling and sampling water; and all associated Water Environment report writing.
- Full driving license.

#### **Responsibilities:**

- Environmental Impact Assessment Reports (EIAR) water chapters for quarry, power and built environment projects;
- Development of Conceptual Site Models; Permitting / Licencing, including Discharge Licences and Industrial Emissions Licencing;
- Site work including management and supervision of drilling and water sampling; and
- Technical report writing and review.
- It is desirable that applicants have some experience of using GIS software
- The role will involve undertaking site work, which may include working away from home for short periods and attending client meetings both locally and further afield as required.

#### **Other Benefits include...**

- Competitive Salary
- Flexible & remote working policies
- Twice annual promotion process
- VHI Healthcare
