### **Junior Geotechnical Engineer / Engineering Geologist**

Ground Investigations Ireland are recruiting Geotechnical Engineers and Engineering Geologist from graduate level. The successful candidate will work on a broad range of Geotechnical projects. The role will focus mainly on geotechnical projects with an overlap with parallel geo-environmental site investigations.

The role will be based in our Dublin office with a requirement for site work throughout the country.

#### **Duties:**

- Supervision of geotechnical site investigations.
- Preparation of factual data from site works including logging.
- Interpretation and presentation of laboratory and field data.
- Preparation of factual and interpretive reports.
- Ensuring quality across all stages of projects.
- Implementation of H&S policy across all projects.

#### **Required Experience:**

- Degree in Geology, Civil / Geotechnical Engineering or Engineering Geology - Masters Degree in Geotechnical Engineering or Engineering Geology desirable.
- Ability to manage multiple projects under direction from senior staff.
- Strong report writing and communication skills.
- Working knowledge of GIS, AutoCAD and logging software desirable.
- Excellent skills in Microsoft Office are essential.
- Full Clean Driving Licence required.
