

Energy Webinar Series

Institute of Geologists of Ireland (IGI) is pleased to announce our lunchtime Energy Webinar Series commencing October 2025

Join us for an online seminar series focused on the energy transition. This four-part lunchtime webinar series will spotlight key areas of energy geoscience, featuring expert speakers from academia, government agencies, and industry. Attendees will gain an understanding of how geoscience supports Ireland's energy security and sustainability, and insights into cutting-edge research and industry developments.

Dates: October & November 2025 (midweek, 1-2 PM)

Location: Online via IGI Zoom

Who should attend: The seminars will be tailored for early and mid-career scientists, geoscientists, engineers and planners. CPD Eligible for IGI members. There will be 40min presentations, with 10-15min for audience Q&A

Cost: Free to attend, though numbers will be limited

Registration: Please register interest [here](#).

Programme and Key topics:

- *Wed 8th October 1pm:* Aaron Lim, University College Cork
 - Seafloor mapping in support of offshore renewable energy development
- *Wed 22nd October 1pm:* Sarah Blake, Geological Survey Ireland
 - Geothermal energy in Ireland - recent developments and future plans
- *Wed 5th November 1pm:* Paul Cullen, ESB
 - Title TBC (Hydrogen Energy)
- *Thurs 20th November 1pm:* Kara English, University College Dublin
 - GeoStorIE. Update on the assessment of Ireland's offshore geostorage potential
